

```
1 package madhav;
2 abstract class Shopping{
3     abstract void offers();
4 }
5 class Amazon extends Shopping{
6     public void offers() {
7         System.out.println("Great Indian festival sell from 6-
8 oct");
9     }
10 }
11 class Flipcart extends Shopping{
12     public void offers() {
13         System.out.println("Big billion days from 5-9 oct");
14     }
15 }
16 class User {
17     public void getOffers(Shopping obj) {
18         obj.offers();
19     }
20 }
21 public class IITM_5 {
22     public static void main(String args[]) {
23         User u=new User();
24         u.getOffers(new Amazon());
25         u.getOffers(new Flipcart());
26     }
27 }
```
